EXECUTIVE TECHNICAL BRIEF

RIYADH, KINGDOM OF SAUDI ARABIA

Sovereign Digital Presence & Infrastructure Architecture

Prepared specifically for **Haitham Al Rebh** (Principal & Founder) and **Roman J. Zytek, PhD** (Partner). Translating Economic Architecture Advisory's sovereign practice—operating across macroeconomic policy, institutional diagnostics, financial system dynamics, and strategic research—into a digital experience projecting **quiet authority, analytical depth, and institutional credibility**.

The Firm's Structural Lens

Economic outcomes emerge from dynamic structural feedback loops governed by incentive geometry. The digital platform must articulate this analytical rigor to sovereign clients, ministries, central banks, and multilateral institutions.

> *"Structure the Incentives. Diagnose the System. Redesign the Structure. Improve the Outcome."*

Digital Mandate Objectives

- **Bilingual Arabic/English Parity:** Full bidirectional fidelity (LTR/RTL), custom Noto Sans Arabic typography, and zero-shift language switching.
- **Exact Brand Guidelines 2026:** Strict adherence to Midnight (`#102C3A`), Copper (`#C98352`), Warm Neutral (`#F5F0E8`), and Blue Grey (`#7B929B`).
- **Client-Owned Sovereign Infrastructure:** Zero-trust email on `econarc.com.sa` with SPF, 2048-bit DKIM, DMARC, and DNSSEC.
- **Research Engine:** Dynamic CMS repository for white papers, working papers, policy briefs, and downloadable publications.

Alignment Across the Six Core Advisory Domains

The digital architecture is structured to mirror the firm's interconnected analytical disciplines with distinct taxonomy, research cross-tagging, and executive clarity:

01. MACROECONOMIC POLICY
Macro frameworks, fiscal & external sustainability, stabilization policy, macroeconomic surveillance, and policy coordination.

02. INSTITUTIONAL DIAGNOSTICS
Institutional effectiveness, policy capacity, governance structures, implementation constraints, and reform architecture.

03. FINANCIAL-SYSTEM DEV.
Credit markets, financial sector development, macroprudential policy, risk management, supervision, and inclusion.

04. PRODUCTIVITY & DIVERSIF.
Total factor productivity, broad-based growth, competitiveness, innovation systems, human capital, and economic diversification.

05. SOVEREIGN & PUBLIC FINANCE
Public financial management, fiscal rules, sovereign wealth, debt & asset management, performance budgeting, and resilience.

06. STRATEGIC ECONOMIC RESEARCH
Applied research, economic intelligence, working papers, country briefs, scenario modeling, and evidence-based decision support.

BRAND PERSONALITY & TONE

Intellectually Serious · Clearly Structured · Evidence-Led.
We eschew startup clichés and visual noise. The platform prioritizes calm negative space, restrained typography, and architectural geometry.

BILINGUAL INSTITUTIONAL PRESENTATION

Designed specifically for senior Saudi ministerial and GCC decision-makers. Arabic is treated as a primary sovereign language, not an afterthought translation layer.

Webflow CMS: High-Performance Architecture for Advisory Publishing

Webflow is the ideal platform for Economic Architecture Advisory. It combines rapid 2–3 week delivery velocity, visual autonomy for economists and advisory leadership, and a fully managed Tier-1 cloud infrastructure with zero server maintenance.

VISUAL ADVISORY EDITING
Advisory leadership updates policy briefs and working papers directly on-page with zero coding knowledge required.

NATIVE ARABIC RTL ENGINE
Webflow Localization applies automatic `dir="rtl"`, per-locale font styling, localized URLs, and regional SEO hreflang tags.

ZERO SERVER DEVOPS
Fastly & AWS edge CDN caching, automatic SSL, DDoS protection, SOC 2 compliance, and zero database patching.

Technical Capabilities & Implementation Parameters (Webflow Premium)

FEATURE DOMAIN	WEBFLOW IMPLEMENTATION SPECIFICATION	ADVISORY PRACTICE BENEFIT
Delivery Velocity	Rapid 2–3 week build; visual markup without backend overhead, allowing complete focus on brand geometry and typography.	Immediate readiness for high-level client engagements and ministerial proposals.
Bilingual Typography	Headlines in **Grenda**, Latin body in **Satoshi**, Arabic in **Noto Sans Arabic**; custom logical CSS spacing.	Authentic institutional parity between English and Arabic without awkward alignment shifts.
Research Repository	Up to 20,000 items and 40 collections; multi-faceted filtering by domain, publication date, and format.	Structured repository for white papers, working papers, country briefs, and policy commentary.
Large Document Handling	Native file uploads up to 10 MB per PDF. Larger white papers linked via high-speed Cloudflare R2 / AWS S3 cloud storage.	Unrestricted file size capacity for heavy econometric reports and charts.
Inquiry Intake Forms	Native encrypted forms with reCAPTCHA spam mitigation and direct cryptographic email forwarding to leadership.	Discrete, reliable engagement intake for sovereign, ministerial, and multilateral clients.

Structured Information Architecture & Core Collections

1. SERVICE DOMAINS
6 Core Domains: Title, summary, structural lens, related insights, localized Arabic fields.

2. LEADERSHIP BIOS
Executive credentials (ex-MEP, IMF, G20, SIMAH), photo, order, LinkedIn profile.

3. INSIGHTS REPOSITORY
White papers, policy briefs, article type, date, authors, domain tag, PDF download URL.

4. INQUIRIES GATEWAY
Encrypted form submission, domain routing, automated email dispatch to leadership.

Client-Owned Infrastructure & Zero Agency Hosting Markup

In strict adherence to sovereign governance, **we do not host client websites on agency accounts or charge hosting markups**. All accounts (domain registrar, Webflow workspace, Google Workspace / Microsoft 365) are registered directly in **Economic Architecture Advisory's name**. All third-party fees are paid directly to vendors, eliminating agency dependency and risk.

Verified Monthly Project Infrastructure Running Costs (Direct Vendor Invoices)

INFRASTRUCTURE COMPONENT	VERIFIED PLAN & PLATFORM INCLUSIONS	ANNUAL BILLING	MONTHLY BILLING
Webflow CMS Hosting	**Premium Site Plan:** Custom domain, 20,000 CMS items, 50 GB Fastly/AWS CDN bandwidth, site search, form uploads.	**$25.00 / mo** ($300/yr upfront)	**$39.00 / mo** (Month-to-month)
Arabic Localization	**Localize Essential:** 1 secondary Arabic locale, native automatic RTL, localized SEO, styles & hreflang.	**$9.00 / mo** ($108/yr upfront)	**~$12.00 / mo** (Month-to-month)
Webflow Platform Total	**Fully managed cloud hosting, automated SSL, DDoS defense, zero server maintenance.**	**~$34.00 / mo** **($408/year total)**	**~$51.00 / mo** (Flexible billing)
Saudi Domain (.com.sa) `econarc.com.sa`	**If already owned by firm: $0 upfront** (annual renewal only ~60–80 SAR / ~$16–21/yr via local Saudi registrar). **If new registration via Saudi CST/SaudiNIC registrar (e.g., Sahara Net, NourNet with CR): ~60–100 SAR / year** (~$16–$27 USD/year, approx. $1.50–2.25/mo). **If registered via global registrar (e.g., 101domain, Marcaria): ~$50–$90+ USD / year** (~$4.20–$7.50/mo) due to international administrative routing.		
Enterprise Email Suite	**Google Workspace Business Starter** (~$6.00/user/mo annual, $7.20 flexible) or **Microsoft 365 Business Basic** (~$6.00/user/mo). For an executive team of 3 mailboxes (e.g., `haitham@`, `zytek@`, `inquiries@`), total is **~$18.00–$24.00 / month** paid directly to Google/Microsoft.		

*Note: All subscription fees are paid directly by the client to third-party vendors with zero markup. Agency professional development fees are separate and aligned in the discovery meeting.

Cryptographic Mail Deliverability Suite (econarc.com.sa)

1. Sender Policy Framework (SPF) — DNS TXT

Restricts email sending authority strictly to authorized Google/Microsoft servers, stopping spoofing.

```
v=spf1 include:_spf.google.com ~all
```

2. DKIM 2048-bit Signing — RSA Cryptography

Signs outbound executive emails with a cryptographic key, guaranteeing message integrity in transit.

```
k=rsa; p=MIIBIjANBgkqhkiG9w0BAQEFAAOCAQ8AMIIBCg...
```

3. DMARC Policy & Telemetry — Policy Enforcement

Instructs recipient gateways to reject fraudulent mail while routing daily forensic telemetry to security.

```
v=DMARC1; p=reject; rua=mailto:dmarc@econarc.com.sa
```

4. DNSSEC & Strict Transport — Root Integrity

DNSSEC signing at registrar level protects `.com.sa` domain against DNS cache poisoning, with TLS 1.3.

```
RFC 8461 (MTA-STS) & RFC 8460 (TLSRPT) Active
```

Senior Delivery Specialists Assigned to the Mandate

VIRANGA LAKSHAN — SENIOR 2+ YEARS EXP.
Frontend Engineering & CMS Architecture Lead
Enterprise CMS developer with hands-on delivery across Webflow, Sitecore Helix, Umbraco Headless, Storyblok, and Strapi. Built UAE government cultural platforms and Middle East multilingual digital portals.

AVISHKA MEDDEGODA — 6+ YEARS EXP.
Cloud Architecture & Security Hardening Lead
Specialist in scalable cloud architectures, DNS security, and enterprise API integrations. Delivered mission-critical systems for regional telecom operators (Ooredoo Algeria, Ooredoo Maldives). Author of published IEEE research.

JANITH KAVISHKA — 2+ YEARS EXP.
Frontend Components & Localization Engineer
Full-stack developer specializing in React, Next.js, TypeScript, and responsive layouts. Experience delivering enterprise web systems and cloud migrations for multinational clients (SINGER Sri Lanka PLC, AWS RDS).

LITHUMITHA RAVIKUMAR — 2 YEARS EXP. (PM)
Dedicated Project Manager & Delivery Governance
Dedicated Project Manager (First Class Honours, Business Information Systems). Extensive experience managing international deliverables, including Al Ain Museum UAE delivery coordination and Australian investment platforms.

Recent International & GCC Enterprise CMS Projects (Delivered by Team)

Al Ain Museum V2 (UAE) — alainmuseum.ae
Sitecore Headless V2 Rebuild · Government Cultural Platform
Rebuilding multi-site ecosystem with Next.js/React frontend & Sitecore Headless CMS. Implemented recursive logic to traverse and render nested Sitecore hierarchies. Built by Viranga & Lithumitha.

Natural History Museum Abu Dhabi — nhmad.ae
Sitecore Helix Architecture · Abu Dhabi Government
Implemented Sitecore CMS solutions following Helix principles for high-traffic government digital experience platform. Built custom C#/.NET components for multilingual content delivery.

Holsten Arabia — holstenarabia.me
Headless CMS + Next.js · Bilingual Middle East Experience
Built responsive multilingual digital experience platform across Middle Eastern markets, managing custom content schemas, RESTful APIs, and cross-device performance.

Gravitee.io — gravitee.io
Storyblok Headless + Astro · Global Digital Experience
Engineered reusable content components consuming headless CMS APIs, structured for modular, ultra-fast content-driven page delivery for global tech client.

4-Week Phased Delivery Roadmap

Week 1: Foundations	Scope alignment, design tokens (Midnight, Copper, Neutral), Home + global components in English.
Week 2: Templates & CMS	All page templates, 6 Domains structure, Insights research repository with filters, and inquiry forms.
Week 3: Bilingual & DNS	Arabic locale, Noto Sans Arabic typography, RTL fixes, Google/M365 routing, SPF/DKIM/DMARC hardening.
Week 4: QA & Handover	Cross-device testing, SEO tags, recorded editor training (1–2 hrs), admin documentation, and launch.

DISCOVERY CALL & NEXT STEPS

Consistent with sovereign advisory engagements, professional development fees and milestone allocations will be aligned during our introductory discovery meeting based on your confirmed scope and publication schedule.

Initiate Engagement:
We are available for an introductory alignment session to review visual prototypes, demonstrate Webflow editing, and verify domain setup.
