Associate Project Manager | Product & Project Delivery | Agile & Waterfall

Colombo-5, Sri Lanka | +94 70 209 5943 | lithumitha.r@gmail.com | linkedin.com/in/lithumitha-ravikumar-9b2137223

PROFESSIONAL SUMMARY

Results-driven Project Manager with 2+ years of experience delivering complex digital products, from enterprise analytics platforms to SaaS solutions, on time and within scope. Skilled in leading cross-functional teams, translating ambiguous business requirements into actionable plans, and driving end-to-end product delivery. Proven track record in requirements gathering, user story creation, acceptance criteria definition, and sprint coordination for products serving international user bases. Proficient in Agile and Waterfall methodologies, stakeholder management, risk mitigation, and project planning using JIRA and MS Project. First Class Honours graduate in Business Information Systems with a proactive mindset and a focus on measurable business outcomes.

CORE SKILLS

- Agile Project Coordination - Scrum & Waterfall Methodologies - Sprint Planning & Execution
- Requirements Gathering & Documentation (SRS, Change Requests) - User Story & Acceptance Criteria Writing
- Stakeholder Communication & Reporting - Client Relationship Management
- Risk Identification & Change Management - Milestone Tracking & Delivery Monitoring
- Release Management - Project Quotations, Budgeting & Cost Estimation
- Project Management Tools: JIRA, JIRA Product Discovery, MS Project, Excel
- Competitor Research & Analysis -UI/UX Principles - Process Improvement

PROFESSIONAL EXPERIENCE

Associate Project Manager | Arimac Digital *June 2025 - Present*

- Manage end-to-end delivery of client-facing dashboard, analytics, and SaaS products for international stakeholders, serving diverse global user bases.
- Lead requirement-gathering sessions, translating business needs into detailed user stories, acceptance criteria, and comprehensive requirement documentation.
- Serve as primary liaison between clients and cross-functional teams (engineering, QA, design, and DevOps), ensuring clear communication and alignment on product goals and objectives.
- Plan project timelines, milestones, and delivery schedules, tracking progress against scope, budget, and deadlines.
- Prepare project quotations, budgets, cost estimates, and effort estimations.
- Monitor sprint and project progress, providing stakeholder management, sprint support, and blocker resolution to ensure successful delivery.
- Conduct regular client meetings, status updates, clarification sessions, and stakeholder reviews to ensure project outcomes meet expectations.
- Track risks, dependencies, and change requests while maintaining project trackers, meeting minutes, and supporting documentation to ensure transparency and continuity.
- Coordinate release planning, production deployments, release activities, and post-release validation to ensure quality, timely delivery.
- Leverage AI tools to synthesize competitor research and streamline feature-inventory creation, reducing turnaround time for product ideation and strategic planning.
- Prepare request for proposals to attract new client projects.

Business Analyst, Project Manager & Digital Marketing Intern | Creo360 *July 2023 - June 2024*

- Compiled comprehensive competitor research, including feature inventories, pricing comparisons, and SEO-driven traffic data analysis, to support product ideation and strategic decision-making.
- Authored detailed user stories and acceptance criteria, performing full product management and requirement documentation for each feature.
- Served as first-line responder for developer and QA clarification questions during sprint execution, providing stakeholder management and technical communication while escalating product decisions to senior stakeholders.
- Maintained product research documentation and groomed user-story cards using JIRA Product Discovery, ensuring clear prioritization and alignment before refinement sessions.
- Facilitated cross-functional collaboration between developers, QA, and clients, ensuring alignment on project scope and requirements.
- Conducted structured research and data analysis using spreadsheets to support product decisions and identify improvement opportunities.

Online Mathematics Tutor | Third Space Global *January 2022 – July 2025*

- Conducted personalized online math tutoring sessions for UK students, applying analytical and problem-solving skills.
- Assessed student progress and adjusted teaching strategies based on data-driven insights.
- Maintained a secure learning environment by adhering to safeguarding policies and procedures.

KEY PROJECTS

Castle Visualizer - Enterprise Data & Analytics Platform

Client: Castle Group (Australia) | Role: Associate Project Manager

Led delivery of a multi-dashboard analytics and data integration platform, managing requirements definition, sprint coordination, and cross-team collaboration to consolidate data from multiple business systems into a unified, real-time reporting environment.

Arimac eCom - Enterprise Digital Commerce SaaS Platform

Product: Arimac eCom | Role: Associate Project Manager & Product Owner

Managed end-to-end delivery of a scalable multi-tenant SaaS e-commerce platform, overseeing requirements definition, sprint planning, cross-team coordination across 4 squads, risk management, stakeholder reporting, and release governance for enterprise clients.

Guardian Funds Dashboard - Investment Portfolio Analytics Platform

Client: Guardian Funds (Australia) | Role: Associate Project Manager

Managed planning of an investment analytics dashboard, gathering requirements and coordinating cross-functional teams to visualize portfolio performance and financial metrics for senior stakeholder decision-making.

Guardian Funds Website - Corporate Investment Website

Client: Guardian Funds (Australia) | Role: Associate Project Manager

Coordinated delivery of a corporate investment website, gathering requirements and performing quality assurance by validating QA test cases against acceptance criteria.

Al Ain Museum Website

Client: Al Ain (UAE) | Role: Project Coordinator, Internal Delivery Team

Coordinated internal delivery of the official website for Al Ain Museum, a prominent cultural heritage institution in Dubai, UAE, managing cross-functional workflows across design, development, and QA while tracking sprint progress and resolving blockers.

JobArmer — Field Service Management SaaS Platform

Product: JobArmer | Role: Intern Business Analyst, Project Manager & Product Owner

Contributed as BA and PM to a web and mobile SaaS platform enabling field service businesses to manage customers, schedule jobs, dispatch technicians, and handle invoicing. Led requirements gathering, maintained the product backlog, facilitated sprint ceremonies, and produced delivery documentation.
