METAMORPHIC DESIGNS FIRM OPERATING SYSTEM

End-to-End Connected Notion Architecture for Interior Design & Architecture Practice

Client: Devendra Parvalkar, Partner & Principal Designer
Practice: Metamorphic Designs, Pune (18 Years of Excellence)
Timezone: 100% Synchronous IST (UTC+5:30 Sri Lanka & India)
Engagement: Fixed-Price Milestones with 30-Day Support

Metamorphic: Unified Practice Management & Operational Workspace

A custom-engineered, relational Notion workspace uniting Project Management, Sales CRM & Lead Intake, Site Execution, Material & Vendor Procurement, Content Marketing, HR Governance, and Executive Dashboards into one single source of truth—built ground-up for how an elite interior and architecture firm truly executes.

Focus: **Residential, Hospitality, Commercial & Bungalows** | Architecture: **Connected Relational Schema & Rollups**

Operations: **11-Stage Design-to-Handover Workflow** | Security: **Granular Teamspaces & Export Lockdown**

Delivery: **5-Stage Phased Rollout + SOP Playbook**

1. EXECUTIVE SUMMARY & DELIVERY APPROACH

Engineered Specifically to Eliminate Scattered Spreadsheets & WhatsApp Chaos

The Operational Challenge in Design Practices

CURRENT REALITY

Over 18 years of growth, handling residential bungalows, luxury penthouses, hospitality venues, and commercial spaces creates intense cross-functional coordination:

- **Fragmented Data Silos:** Drawings in Drive, leads in WhatsApp, contractor rates in Excel, and daily site updates trapped in phone chats.
- **Lack of Stage Visibility:** Partners cannot see at a glance where approvals, payments, or procurement bottlenecks are stalling projects.
- **High Team Turnover Risks:** Designers and site supervisors join and leave; without automated onboarding, offboarding, and access controls, valuable IP, vendor rates, and client data are exposed.

Our Solution Architecture for Metamorphic

ENGINEERING SQUAD

This is not a generic template install. Our **3-specialist squad** builds an interconnected, relational system tailored to your exact 18-year operational reality:

- **Central Relational Data Core:** Clients ↔ Projects ↔ Tasks ↔ Vendors ↔ Invoices ↔ Marketing Assets are linked through two-way relations and automated rollups.
- **Stage-Triggered Automation:** Moving a project from *3D Visualisation* to *Drawings & BOQ* automatically generates the required stage checklists and assignee tasks.
- **Pragmatic Security:** Strict Teamspace permissions, restricted views, and disabled workspace export/duplication protect Metamorphic's proprietary workflows and client data.

2. WORKSPACE ARCHITECTURE & MODULE ALIGNMENT

Comprehensive Scope Covering Every Department

MODULE & PRIORITY	NOTION TECHNICAL ARCHITECTURE & CAPABILITIES	IMPACT FOR METAMORPHIC TEAM
1. Workspace Core & Relational Map	Master database schema, standardized property taxonomy, unified status vocabulary, and visual navigation hub.	Clean, uncluttered workspace where every department navigates instinctively in 2 clicks.
2. Project Management (Core Priority)	11-stage design-to-handover workflow, auto-task generation, 3D/Drawing approvals tracker, and mobile site execution logs.	Real-time project health, stage deadlines, drawing revision logs, and zero dropped execution tasks.
3. Sales CRM & Tele-calling	Multi-channel lead capture (WhatsApp, phone, social), kanban pipeline, tele-calling caller metrics, and 1-click won lead conversion.	Complete sales visibility, automated reminders, and instant project kickoff when contracts are signed.
4. Marketing & Pune SEO	Content calendar (Reels, YouTube, FB), on-site shoot repository linked to projects, and Pune local SEO/keyword tracker.	Streamlined content production turning completed architectural projects into high-converting social proof.
5. Operations, BOQs & Vendors	Categorized vendor/contractor directory, material library, PO tracking, BOQ estimated vs actual margin variance, and payment milestones.	Eliminates cost overruns, tracks vendor payment releases, and protects project profit margins.
6. HR, Attendance & Security	Team directory, 9:30 AM–6:30 PM attendance/leave tracker (Mon off), 30-60-90 onboarding, and strict offboarding access revocation.	Partners and HR maintain complete control over employee access and sensitive company IP.
7. Partner Live Dashboard	Executive command center: active projects by stage, overdue tasks, revenue pipeline, collections due, and team workload.	Devendra and partners can assess firm health in 60 seconds without messaging multiple managers.

100% Synchronous IST Availability (Sri Lanka & Pune, India)

Based in Sri Lanka (UTC+5:30), our entire team works in the **exact same timezone** as Pune, India. We are available for live video discovery sessions, daily sprint updates, and interactive team training during your regular 9:30 AM – 6:30 PM business hours.

PROJECT MANAGEMENT & SALES CRM CORE ENGINE

The Operational Engine: From First Enquiry to Site Handover

11 Project Stages: Pre-Design to Handover
Lead Ingestion: Multi-Channel & Automated
Approvals: Version-Controlled 3D & Drawings

3. PROJECT MANAGEMENT MODULE (CORE PRIORITY)

Tailored to Interior Design & Architecture Lifecycles

The 11-Stage Master Project Pipeline LIFECYCLE

Every project flows through a standardized, stage-governed pipeline with automated stage gates:

```
01. Enquiry ➔ 02. Site Visit ➔ 03. Concept Design ➔
04. Design Development ➔ 05. 3D Visualisation ➔
06. Working Drawings & BOQ ➔ 07. Client Approval ➔
08. Procurement & POs ➔ 09. Site Execution ➔
10. Snagging & Finishing ➔ 11. Final Handover
```

- **Auto-Task Stage Generation:** Advancing to a stage automatically creates its designated deliverables (e.g., entering Stage 06 creates Electrical, Plumbing, Flooring, and Ceiling drawing tasks).
- **Tailored Views by Role:** Timeline (Gantt) for leads, Kanban boards for designers, execution checklists for site engineers, and milestone cards for partners.

Approvals, Site Logs & Client Portals EXECUTION

Design Approvals Tracker: Version-controlled logging for 2D AutoCAD drawings, 3D SketchUp/3ds Max renders, and physical material sample sign-offs with client timestamps.

Mobile Site Execution Tracker: Site supervisors can upload daily progress photos, log contractor headcounts, flag on-site obstacles, and maintain a live Snag List with contractor assignments and completion statuses.

Secure Client-Facing Portal (Optional): A clean, read-only dashboard allowing clients to see project milestones, approved renders, and meeting minutes without accessing sensitive BOQs or vendor costs.

4. SALES & CRM MODULE

Capturing, Qualifying and Converting Leads Across All Channels

Multi-Channel Lead Capture & Ingestion INTAKE

Centralize leads coming from WhatsApp, phone calls, Instagram DMs, YouTube comments, Facebook ads, website forms, and tele-callers:

- **Direct Webhook / Automation Ingestion:** Connect website forms and WhatsApp inquiries directly into Notion via **Make / n8n** or Notion native forms.
- **Lead Taxonomy:** Captures Source, Location (Baner, Koregaon Park, Wakad, etc.), Property Type (Bungalow, Villa, 3BHK/4BHK), Budget Range, and Lead Temperature (🔥 Hot, 🟠 Warm, ❄️ Cold).
- **Automated Follow-Up Reminders:** Notion database automations alert sales representatives before follow-ups become overdue.

Sales Pipeline & 1-Click Conversion KANBAN PIPELINE

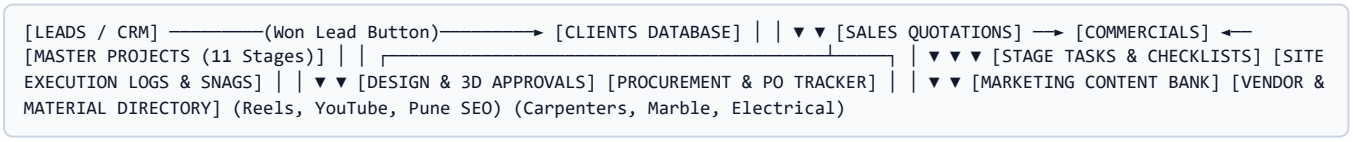

Active Pipeline Stages: *New Lead* ➔ *Contacted* ➔ *Qualified* ➔ *Site Meeting* ➔ *Proposal Sent* ➔ *Negotiation* ➔ *Won / Lost* (with lost-reason analytics: budget, timeline, competitor).

Tele-Calling Team Dashboard: Dedicated view tracking daily calls dialed, connects, qualified leads, and site meetings booked per tele-caller.

1-Click Won Conversion: Clicking "Won" triggers a Notion button that automatically creates the new Client record, initializes the Master Project with pre-filled scope and budget, and archives the lead seamlessly.

5. MASTER RELATIONAL DATABASE MAP

How Data Flows Across Metamorphic's Workspace

OPERATIONS, MARKETING, HR & SECURITY

Securing Company Intellectual Property, Vendor Costing, and Team Operations

GOVERNANCE

Working Hours: 9:30 AM – 6:30 PM (Mon Off)
Security: Restricted HR & Finance Teamspaces
Content Hub: Project-to-Content Pipeline

6. OPERATIONS, BOQS, VENDORS & PROCUREMENT

Eliminating Material Delays and Protecting Project Margins

Vendor & Contractor Directory

DIRECTORY

Centralized database of trusted trade partners: Carpenters, Civil Contractors, Painters, Electricians, False Ceiling, Marble/Granite suppliers, and Modular Kitchen fabricators.

- Track specialty category, quality rating (1–5 stars), standard labor/material rates, contact details, past Metamorphic projects, and payment terms.
- Link contractors directly to active project site execution tasks and snag lists.

BOQs, PO Tracking & Milestone Invoicing

FINANCIAL HEALTH

Procurement & PO Tracker: Track items across project stages: *Ordered* ➔ *In Transit* ➔ *Delivered to Site* ➔ *Installed* ➔ *Approved*.

BOQ Variance Analysis: Compare Estimated BOQ Costs vs. Actual Site Incurred Costs with automated margin rollups to prevent budget leakage.

Milestone Payment Tracker: Track client billing milestones (Booking, Concept Signoff, Execution Milestones, Handover) and upcoming vendor payments.

Marketing & Pune Local SEO Module

SOCIAL & GROWTH

Turn completed interior and architecture projects into steady inbound client acquisition:

- **Content Calendar:** Track multi-platform pipeline for Instagram Reels, YouTube home walkthroughs, and Facebook posts (*Idea* ➔ *Script* ➔ *Shoot* ➔ *Edit* ➔ *Scheduled* ➔ *Published*).
- **On-Site Shoot Linkage:** Link content pieces directly to completed projects for effortless sourcing of before/after photos and site walk videos.
- **Pune AEO & Keyword Registry:** Database of target search terms (e.g., "*Bungalow Architects Pune*", "*Luxury Interior Designers Koregaon Park*") tied to Google Business Profile updates.

HR, Attendance & Role-Based Governance

STRICT SECURITY

Manage your team cleanly while locking down sensitive company assets:

- **Attendance & Leave Tracker:** Tailored to Metamorphic's 9:30 AM – 6:30 PM schedule, six days a week with Monday weekly off.
- **Standardized Onboarding (30-60-90):** Automated checklist, tool access provisioning, design standards review, and SOP reading tasks.
- **Rapid Offboarding Protocol:** Checklists to immediately revoke workspace access, reassign active tasks, and ensure drawings/files remain secure.
- **Recruitment Pipeline:** Job openings, candidate resumes, interview feedback, and hiring decisions.

7. PERMISSIONS, SECURITY & HONEST NOTION PROTECTION ADVICE

Protecting Client Confidentiality, Vendor Pricing and Firm IP

Teamspace Isolation

ACCESS CONTROL

Create strictly separated Teamspaces: *Partners Only* (Financials, HR, Margins), *Design Studio*, *Site Operations*, and *Sales & Marketing*.

Export & Duplication Lockdown

IP SECURITY

Disable workspace-level exporting and template duplication across non-admin roles to prevent unauthorized bulk downloading of database lists.

Honest Notion Boundaries

BEST PRACTICES

Notion does not support column-level masking within a database. We architect separate relational summary databases for partners so staff cannot see profit margins.

IMPLEMENTATION ROADMAP & SQUAD

EXECUTION PLAN

Phased Milestone Delivery, Team Resumes, Tooling Costs & Discovery Kickoff

Execution Model: 5-Stage Phased Rollout
Timeline: 5–6 Weeks to Full Adoption
Warranty: 30 Days Dedicated Support

8. PHASED IMPLEMENTATION ROADMAP & MILESTONES

Structured Rollout Ensuring Team Adoption Without Overwhelm

Milestone 1: Discovery & Architecture Blueprint — WEEK 1

- Run a 45-minute video discovery session with Devendra and key department heads.
- Deliver interactive Workspace Map & Database Relational Diagram for partner approval before building.
- Establish master taxonomy, property standards, and Teamspace security boundaries.

Milestone 2: Project Management & Sales CRM — WEEKS 2–3 (CORE PRIORITY)

- Build the 11-stage Projects database with auto-generating stage task checklists and templates.
- Deploy Design Approvals tracker, Mobile Site Execution photo log, and Snagging system.
- Build Sales CRM, Tele-calling tracker, lead capture forms, and 1-click won lead conversion.

Milestone 3: Operations, BOQ, Marketing & HR — WEEKS 3–4

- Deploy Vendor & Contractor Directory with ratings, Material Library, and PO tracking.
- Build BOQ cost vs. actual variance tracker and milestone payment schedule.
- Configure Marketing Content Calendar, Pune SEO keyword bank, and Brand Asset wiki.
- Implement HR Directory, Attendance/Leave tracker (Mon off), and Onboarding/Offboarding workflows.

Milestone 4: Data Migration, Dashboards & Training — WEEKS 5–6

- Clean and migrate existing spreadsheets (leads, active projects, vendors, contacts) into Notion.
- Build live Partner Command Dashboard and Departmental dashboards.
- Deliver live recorded training sessions for partners, designers, sales, site team, and HR.
- Hand over written Metamorphic Notion Playbook + 30 days of post-launch adjustment support.

9. MEET THE NOTION SOLUTIONS SQUAD

Dedicated Engineering & Project Governance Team

Viranga Lakshan

LEAD SOLUTIONS ARCHITECT

Associate Software Engineer, Arimac • 4+ Years Systems Experience

Leads workspace architecture, complex relational database schemas, advanced formulas, Notion automations, and third-party webhook integrations (Make/n8n).

Notion Architecture | Relational Schemas | Automations | Make / n8n / APIs

Janith Kavishka

DATABASE & MIGRATION ENGINEER

Programmer, DMS Electronics • Enterprise Data Systems

Specializes in data normalization, Excel/Sheets ETL data cleaning, historical data migration, and formula rollups ensuring zero data loss during import.

Data Migration | Spreadsheet ETL | Data Normalization | Rollups & Formulas

Lithumitha Ravikumar

PROJECT MANAGER & SOP LEAD

Associate Project Manager, Arimac • Enterprise SaaS Delivery

Manages requirement documentation, SOP authoring, milestone delivery governance, user acceptance testing, and live training walkthroughs for team adoption.

Project Management | SOP Playbooks | Team Training | Milestone Tracking

10. THIRD-PARTY TOOLING & COMMERCIAL NEXT STEPS

Transparent Running Costs & Zero Surprises

Estimated Third-Party Software Costs — LOW OVERHEAD

• **Notion Plus Plan:** ~$8–$10/user/month (required for team collaboration and file uploads).
• **Make.com / n8n:** Free tier or ~$9/month (only if automating WhatsApp/web forms into Notion).
• *Zero other mandatory paid subscriptions required. Native Notion features handle 95% of the build.*

Transparent Milestone Contracting — UPWORK ESCROW

We work via structured fixed-price milestone escrow on Upwork. Following a 20-minute discovery call to review your current spreadsheets, we confirm the exact fixed price per milestone within 24 hours.

Ready to Build Metamorphic's Firm Operating System

We are available to start immediately. Please let us know a convenient time for an introductory video call this week so we can review your current spreadsheets and begin drafting your Workspace Architecture Blueprint.
