ABOUT ME

Full-Stack Engineer with 2+ years of experience designing, building, and supporting scalable enterprise web applications and RESTful APIs across the full software development lifecycle. Strong backend expertise in Java and Spring Boot, grounded in object-oriented programming and SOLID design principles, complemented by front-end development experience with Angular, React, and Next.js, and solid database skills in Oracle SQL. Proven track record delivering enterprise solutions for large-scale business environments, spanning requirements analysis, system and database design, API integration, deployment, and production support. Hands-on experience with message-driven architectures using RabbitMQ, enterprise reporting with Eclipse BIRT, and cloud-based data migration and integration on AWS, including RDS and Lambda. Focused on building secure, maintainable, and production-ready systems at scale.

WORK EXPERIENCE

DMS (Pvt) Ltd, Software Division | January 2025 – Present | Sri Lanka

Trainee Programmer → Programmer

- Designed and developed a **field collection and receipt management system** handling batch-wise transaction tracking and mobile receipt generation, including database design and full data migration to Amazon RDS (MySQL) for a production financial workflow for SINGER Sri Lanka PLC.
- Built and maintained backend services using **Java and Spring Boot**, with **RabbitMQ** for message-driven communication between system components in an enterprise-scale application
- Developed frontend interfaces using **React** for a customer-facing portal and an internal management portal, integrating REST APIs to support request, approval, and tracking workflows
- Contributed to an **inventory and distribution tracking platform** built with **Next.js**, integrated with **AWS Lambda** and **Amazon RDS**, supporting end-to-end stock flow across a multi-tier distribution network
- Involved in requirements analysis, system and database design, and preparation of technical documentation and user manuals across multiple enterprise projects
- Took on increased ownership of system design and production support following promotion to Programmer, ensuring uninterrupted operation of deployed applications for island-wide enterprise clients

SiteSolve | October 2024 – January 2025 (3 months) | Sri Lanka

Web Developer (Intern)

- Assisted in developing and maintaining web application features under senior developer guidance
- Gained hands-on exposure to full-stack development practices and version control workflows
- Supported testing and bug-fixing activities to improve application stability

EDUCATION AND TRAINING

BSc (Hons) Computing (Part-time)

Coventry University - UK [12/2024 – 10/2026]

Higher National Diploma In Software Engineering
National Institute of Business Management (NIBM) – Sri Lanka [11/2023 – 12/2024]

Diploma In Software Engineering
National Institute of Business Management (NIBM) – Sri Lanka [10/2022 – 10/2023]

SKILLS

Technical Expertise

Java | Spring Boot | Spring Framework | Spring Security | Spring Data JPA | Microservices Architecture | OOP | SOLID Principles | RESTful APIs | Angular | React | Next.js | TypeScript | Oracle SQL | PostgreSQL | MySQL | RabbitMQ | Kafka | AWS (EC2, RDS, Lambda) | Docker | Linux Server Administration | Nginx | WildFly | Apache LDAP | JWT / OAuth2 | Eclipse BIRT

Tools

Jira | Bitbucket | Git | GitHub Actions | Jenkins | Maven | Postman | Swagger | Confluence | Docker Compose

PERSONAL / PORTFOLIO PROJECTS

Nexware — Warehouse & Distribution Management System

GitHub: https://github.com/janithkavishka31/nexware-frontend.git | https://github.com/janithkavishka31/nexware-backend.git

Full-stack modular monolith application | *Frontend + Backend*

Technologies: Java 21, Spring Boot 3, Spring Modulith, Spring Security, JPA, PostgreSQL, Kafka, JWT, OpenAPI (Swagger), Docker, AWS EC2, Next.js, TypeScript, Tailwind CSS, TanStack Query, Zustand

- Built a modular monolith REST API with JWT authentication, role-based access control, and domain event handling across inventory, purchase order, reservation, warehouse, and supplier modules
- Developed the frontend dashboard with role-based routing, data validation, and pagination, integrated with the backend via REST APIs
- Deployed the production backend on AWS EC2 using Docker, with a custom domain, HTTPS, Neon PostgreSQL, and a GitHub Actions CI/CD pipeline
- Deployed the frontend on Vercel with environment-based API configuration and automated CI

NexCart — Full-Stack E-Commerce Platform

GitHub: https://github.com/janithkavishka31/nexcart-web.git | https://github.com/janithkavishka31/nexcart-api.git

Full-stack application | *Frontend + Backend*

Technologies: React, TypeScript, Vite, Tailwind CSS, Redux Toolkit, RTK Query, Node.js, Express, Prisma, PostgreSQL, JWT, Docker

- Developed a full-stack e-commerce platform with JWT authentication, refresh tokens, and role-based routing for user, seller, and admin roles
- Built storefront, cart, checkout, order management, and seller inventory modules using Redux Toolkit, RTK Query, and form validation
- Deployed the backend on AWS EC2 with Docker Compose and a GitHub Actions CI/CD pipeline, with the frontend deployed on Vercel

InvoiceIQ — AI-Powered Invoice Reconciliation & Exception Management Platform

GitHub: https://github.com/janithkavishka31/InvoiceIQ.git

Full-stack AI-driven application | Frontend + Backend

Technologies: Python, FastAPI, LangGraph, ChromaDB, Sentence Transformers, Pydantic, SQLAlchemy, SQLite, Gmail API, PyMuPDF, Pytest, React, TypeScript, Vite, Tailwind CSS

- Built an accounts payable reconciliation REST API using FastAPI, implementing deterministic 3-way matching algorithms with Decimal precision to detect price variances, quantity discrepancies, and duplicate invoices
- Integrated a LangGraph multi-step investigation workflow and ChromaDB RAG vector store with sentence-transformers for automated root-cause analysis and verified policy citation retrieval
- Engineered an immutable human-in-the-loop approval gate with recipient allowlisting, SHA-256 idempotency controls, append-only audit logging, and automated Gmail API integration for supplier clarifications
- Developed a responsive React + TypeScript dashboard with Tailwind CSS
