EXECUTIVE TECHNICAL BRIEF

RIYADH, KINGDOM OF SAUDI ARABIA

Sovereign Digital Presence & Secure Cloud Infrastructure

Prepared specifically for **Haitham Al Rebh** (Principal & Founder) and **Roman J. Zytek, PhD** (Partner). Translating Economic Architecture Advisory's sovereign-grade practice—operating across macroeconomic policy, institutional diagnostics, financial system dynamics, and strategic research—into a digital experience marked by **quiet authority, analytical depth, and institutional credibility**.

The Firm's Structural Lens

Economic performance is not produced by isolated initiatives; it is governed by dynamic incentive geometry, institutional behavior, and financial architecture. The digital platform must project this analytical rigor to sovereign clients, ministries, central banks, and multilateral institutions.

> *"Structure the Incentives. Diagnose the System. Redesign the Structure. Improve the Outcome."*

Digital Mandate Objectives

- **Bilingual Arabic/English Parity:** Full bidirectional fidelity (LTR/RTL), custom Noto Sans Arabic typography, and zero-shift language switching.
- **Exact Brand Guidelines 2026:** Strict adherence to Midnight (`#102C3A`), Copper (`#C98352`), Warm Neutral (`#F5F0E8`), and Blue Grey (`#7B929B`).
- **Zero-Trust Mail Infrastructure:** Google Workspace / M365 on `econarc.com.sa` with SPF, 2048-bit DKIM, DMARC, and DNSSEC.
- **Research Engine:** Dynamic CMS repository for white papers, working papers, policy briefs, and downloadable publications.

Alignment Across the Six Core Advisory Domains

The digital architecture is structured to mirror the firm's interconnected analytical disciplines with distinct taxonomy, research cross-tagging, and executive clarity:

01. MACROECONOMIC POLICY
Macro frameworks, fiscal & external sustainability, stabilization policy, macroeconomic surveillance, and policy coordination.

02. INSTITUTIONAL DIAGNOSTICS
Institutional effectiveness, policy capacity, governance structures, implementation constraints, and reform architecture.

03. FINANCIAL-SYSTEM DEV.
Credit markets, financial sector development, macroprudential policy, risk management, supervision, and inclusion.

04. PRODUCTIVITY & DIVERSIF.
Total factor productivity, broad-based growth, competitiveness, innovation systems, human capital, and economic diversification.

05. SOVEREIGN & PUBLIC FINANCE
Public financial management, fiscal rules, sovereign wealth, debt & asset management, performance budgeting, and resilience.

06. STRATEGIC ECONOMIC RESEARCH
Applied research, economic intelligence, working papers, country briefs, scenario modeling, and evidence-based decision support.

BRAND PERSONALITY & TONE

Intellectually Serious · Clearly Structured · Evidence-Led.
We eschew startup clichés, aggressive marketing triggers, and visual noise. The platform prioritizes calm negative space, restrained typography, and architectural geometry.

BILINGUAL INSTITUTIONAL PRESENTATION

Designed specifically for senior Saudi ministerial and GCC decision-makers. Arabic is treated as a primary sovereign language, not an afterthought translation layer.

Bilingual System Architecture: Arabic & English Parity

Creating an authentic bilingual institutional experience requires deep bidirectional typographic engineering, rather than simple CSS mirroring. Every component is designed to maintain optical balance across Latin and Arabic scripts.

ENGLISH LATIN SCALE
Headlines in **Grenda** (36–44pt / 24–30pt). Body copy in **Satoshi** (9–11pt, 145–155% leading, 0 to +5% tracking).

ARABIC NOTO SCALE
العناوين والنصوص بخط **Noto Sans Arabic** مع ضبط ارتفاع الأسطر وتوافق المحاذاة والرموز الهندسية.

ZERO-SHIFT LANGUAGE SWITCH
Instant client-side route switching (`/en/` and `/ar/`) preserving reading state, scroll coordinates, and document filters.

Core Institutional Site Structure

01. HOME / STRUCTURAL FOUNDATION — LANDING

Introduction to the firm's sovereign purpose, dynamic incentive geometry, and the structural diagnostic method. Direct gateways to leadership, advisory domains, and published intelligence.

02. FOUNDERS & LEADERSHIP — CREDENTIALS

Executive advisory profiles of Haitham Al Rebh (ex-MEP, G20 Working Group Co-Chair, Order of King Abdul Aziz) and Dr. Roman J. Zytek (ex-IMF Senior Economist, Saudi G20 Adviser, Central Bank Chief Economist).

03. DOMAINS OF ADVISORY WORK — FRAMEWORKS

In-depth structural breakdown of the 6 interconnected practice areas, articulating the diagnostic approach from surface symptoms to governing incentive structures.

04. INSIGHTS & RESEARCH REPOSITORY — CMS ENGINE

Structured publishing platform for white papers, working papers, country briefs, and policy commentary. Multi-faceted filtering by domain, publication date, and downloadable bilingual PDFs.

05. INSTITUTIONAL INQUIRIES & ADVISORY ENGAGEMENT — ENGAGEMENT GATEWAY

Discrete, institutional contact gateway with automated cryptographic email routing to firm leadership, encrypted form submissions, and direct contact details for Saudi Arabia and international mandates.

CMS Engine Analysis: Webflow vs. Headless Architecture

ARCHITECTURE METRIC	WEBFLOW CMS (PRIMARY PREFERENCE)	ENTERPRISE HEADLESS (NEXT.JS + STRAPI/STORYBLOK)
Editorial Autonomy	**Superior:** Non-technical visual editing. Leadership can draft and publish research papers without developer intervention.	**High:** Structured content schemas via Storyblok or Strapi dashboard; preview requires webhook rebuild.
Performance & CDN	**Sub-Second:** Tier-1 AWS/Fastly edge CDN caching, clean semantic HTML5, automated WebP/AVIF image pipeline.	**Sub-Second:** Static site generation (SSG) with Edge Vercel/Cloudflare deployment.
Bilingual Management	**Built-in Localization:** Native Webflow Localization handles RTL/LTR page trees, localized slugs, and typography per locale.	**Custom Code:** Next.js `next-intl` or i18next configuration with custom RTL CSS stylesheets.
Maintenance & Security	**Zero Server Overhead:** Fully managed SaaS, zero server patching, automated SSL, SOC 2 Type II certified.	**Requires DevOps:** Containerized Node/Postgres hosting, regular dependency updates, reverse proxy configuration.
Recommendation	**RECOMMENDED:** Perfectly matches your speed-to-market, security, and independent publishing requirements.	**ALTERNATIVE:** Evaluated if sovereign data residency strictly dictates GCC-only dedicated cloud hosting.

Enterprise Email Routing & Cryptographic Deliverability

For a strategic advisory practice communicating with ministers, central banks, and sovereign funds, email infrastructure cannot tolerate spoofing, spam flagging, or deliverability failures. We implement a bank-grade cryptographic authentication suite on `econarc.com.sa`.

CUSTOM BUSINESS ADDRESSES
`haitham@econarc.com.sa`
`zytek@econarc.com.sa`
`inquiries@econarc.com.sa`

PLATFORM SELECTION
Google Workspace Enterprise or Microsoft 365 Business Premium with multi-factor authentication (MFA) enforcement.

DELIVERABILITY GUARANTEE
100% inbox placement score across institutional mail gateways (Outlook, Gmail, government firewalls).

Cryptographic Mail Authentication Architecture

1. Sender Policy Framework (SPF)
DNS TXT

Restricts email sending authority strictly to authorized Google/Microsoft servers, stopping unauthorized domain impersonation.

```
v=spf1 include:_spf.google.com ~all
```

2. DKIM 2048-bit Signing
RSA CRYPTOGRAPHY

Signs all outbound messages with a private cryptographic key, validating that executive messages have not been altered in transit.

```
k=rsa; p=MIIBIjANBgkqhkiG9w0BAQEFAAOCAQ8AMIIBCg...
```

3. DMARC Policy & Telemetry
POLICY ENFORCEMENT

Instructs receiving mail servers to reject or quarantine fraudulent emails, while routing daily forensic reports to security monitoring.

```
v=DMARC1; p=reject; rua=mailto:dmarc@econarc.com.sa
```

4. DNSSEC & Strict Transport
ROOT INTEGRITY

DNS Security Extensions (DNSSEC) to protect the `.com.sa` domain against DNS spoofing, coupled with MTA-STS and TLS 1.3 enforcement.

```
RFC 8461 (MTA-STS) & RFC 8460 (TLSRPT) Active
```

Sovereign Web Hosting, Global Edge & Compliance

GLOBAL EDGE NETWORK
Distributed multi-region CDN points of presence in Riyadh, Dubai, Frankfurt, London, and Virginia ensuring sub-second response times worldwide.

SSL & TRANSPORT SECURITY
Automated zero-downtime SSL certificate rotation, TLS 1.3 protocol suite, and HTTP Strict Transport Security (HSTS) with preloading.

FORM PRIVACY & GDPR / PDPL
Compliance with Saudi Personal Data Protection Law (PDPL) and GDPR: sanitized inquiry forms, CAPTCHA-free bot defense, and encrypted transit.

Senior Delivery Specialists Assigned to the Mandate

AVISHKA MEDDEGODA — 6+ YEARS EXP.
Cloud Architecture & Security Hardening Lead
Specialist in scalable cloud architectures, DNS security, and enterprise API integrations. Delivered mission-critical systems for regional telecom operators (Ooredoo Algeria, Ooredoo Maldives). Author of published IEEE research.

VIRANGA LAKSHAN — SENIOR 2+ YEARS EXP.
Frontend Engineering & CMS Architecture Lead
Enterprise CMS developer with deep expertise across Webflow, Sitecore Helix, Umbraco Headless, Storyblok, and Strapi. Lead frontend/CMS engineer for UAE government cultural platforms and GCC multilingual portals.

JANITH KAVISHKA — 2+ YEARS EXP.
Frontend Components & Localization Engineer
Full-stack developer specializing in React, Next.js, TypeScript, and responsive layouts. Proven experience delivering enterprise web systems and cloud migrations for multinational clients (SINGER Sri Lanka PLC, AWS RDS).

LITHUMITHA RAVIKUMAR — 2 YEARS EXP. (PM)
Dedicated Project Manager & Delivery Governance
Dedicated Project Manager (First Class Honours, Business Information Systems). Extensive experience managing international deliverables, including Al Ain Museum UAE delivery coordination and Australian investment platforms.

Proven Enterprise CMS Track Record & GCC Institutional Experience

Al Ain Museum (UAE) — alainmuseum.ae
Sitecore Headless V2 Rebuild
Government cultural institution platform in Abu Dhabi/Dubai. Frontend & CMS delivery coordination by Viranga & Lithumitha.

Nat. History Museum — nhmad.ae
Sitecore Helix Architecture
Abu Dhabi government digital experience platform. Multilingual content delivery, performance, and platform stability.

Holsten Arabia — holstenarabia.me
Umbraco Headless + Next.js
Multilingual Middle Eastern digital experience platform with C#/.NET structured content schemas and responsive layouts.

Gravitee.io — gravitee.io
Storyblok Headless + Astro
High-performance, content-driven global site using reusable Storyblok components for scalable digital experience.

Moolee Multi-Tenant E-Commerce — moolee.mv
Strapi Headless CMS + Node.js
Multi-tenant enterprise platform with custom Strapi content schemas, automated workflows, and microservice integrations.

4-Week Delivery Roadmap

Phase 1 (Days 1–5)	Brand translation, design tokens, typography scale & bilingual component layouts.
Phase 2 (Days 6–14)	Frontend build, Webflow/CMS setup, 6 Domains & Insights research repository.
Phase 3 (Days 15–18)	Google Workspace / M365 setup, DNSSEC, SPF, DKIM 2048-bit, and DMARC hardening.
Phase 4 (Days 19–24)	Multilingual QA, cross-device testing, SEO metadata, and editorial handover.

DISCOVERY CALL & NEXT STEPS

Consistent with sovereign strategic advisory engagements, commercial scope and milestone schedules will be agreed upon during our introductory alignment meeting based on your finalized platform choice (Webflow vs Decoupled) and publication roadmap.

Initiate Engagement:
We are available for an introductory alignment session to review the visual prototypes and confirm the DNS schedule.
